Accuracy against reference — not probability of physical correctness
H0: AEQGA minus reference (72.832)
H0 offset [km/s/Mpc]
Independent outcome
Reference
Run
Omega_m: AEQGA minus reference (0.362876)
Omega_m offset [dimensionless]
Run
Objective gap above reference
Optimization tolerance
$\Delta\chi^2$
Run
88.3% below stated tolerance
Fraction of runs
$\Delta\chi^2$
